Professional Summary

Third-year Computer Science student at Thapar University with experience in web development, database systems, intelligent document processing, and AI-based platforms. Skilled at delivering practical, user-focused solutions by combining technical knowledge with business insights.

Education

B.E. Computer Science and Business Studies	Expected 2027
Thapar Institute of Engineering & Technology, Patiala CGPA: 8.62	
Class 12 (CBSE)	2023
Government Model Senior Secondary School, Chandigarh 92.2%	
Matriculation (CBSE)	2021
Bhavan Vidyalaya, Chandigarh 93.8%	
Relevant Coursework: Business Communication, Economics, Entrepreneurship, Operational Research , Accounting , Advance Financing	

Projects

Modern Colours — AI Supply Chain Optimization Platform

- Built Modern Colours, an AI-powered supply chain platform connecting manufacturers, warehouses, dealers and buyers.
- Implemented microservices architecture with AI forecasting, real-time order tracking, analytics dashboards and JWT-based access control.
- Deployed containerized services using Docker and enabled event-driven workflows with RabbitMQ for scalability.
- Integrated a Telegram bot for instant notifications, order updates and improved user interaction.

Employee Performance & Audit Record System

- Built an Excel–MySQL–Oracle performance tracker, cutting manual reporting time by 75%.
- Applied automated formulas and conditional formatting to identify performance gaps in real time.
- Reduced monthly report preparation time from two days to two hours through process automation.
- Guided team members in tool adoption, achieving full utilization within two weeks.
- **Certified by Swaraj Mahindra.** View Certificate

LLM-Powered Query–Retrieval System

- Conceived a GPT + FAISS-based retrieval tool delivering 90%+ accuracy on PDF document queries.
- Structured document text into vector embeddings to boost search precision and reduce latency.
- Incorporated caching strategies, improving repeated query speeds by 45%.
- Collaborated with mentors to fine-tune model parameters, raising accuracy by 12%.

Technical Competencies

Operating Systems: Windows

Languages: C++, C, HTML, CSS, JavaScript, Python

Databases: MySQL, Oracle

Tools: Power BI, Figma, VS Code, Git/GitHub, MS Office

Concepts: DSA, OOP, DBMS, Data Analytics, AWS (EC2, S3, SQS, EBS, Beanstalk)

Certifications: AWS Services | Power BI Certificate

Soft Skills: Team Leadership, Project Management, Decision Making, Data Analysis, Business Communication

Experience & Achievements

Industrial Training – Swaraj Engines Ltd. (2024)

- Completed industrial training focused on performance analytics and audit systems.
- Designed and implemented automated performance tracking improving operational efficiency.

Executive Board Member – ECON Society (Creativity & Design Head)

- Led branding, digital creatives, and promotional campaigns for society events.

Executive Committee – Saturnalia & URJA (Creativity Department)

- Contributed to large-scale technocultural and sports fest management.

Hackathon Achievements

- Title Track Winner – HackTU 7.0 (Modern Colours problem statement using Requestly).
- Participated in HackSpire organized by ACM and MLSC.
